- CMS
- SQL
- Umbraco
- QA
- Google Analytics
- Adobe Photoshop
- Bootstrap
- WordPress

EXPERIENCE

- **Epic Games**
  October 2016 / June 2017 - Web QA Tester
  Primarily focused on testing their current sites across the board on all browsers, devices, and languages using many tools to perform full and thorough testing for all websites. Presently helping to setup automation testing for links, server errors and many other smaller tasks that are difficult to check once a day.

- **Pull-A-Part**
  Sep 2015/ Sep 2016 - Front-end Web Developer/Designer
  I spent my time here designing and creating their current site to be mobile and device friendly across the board on all browsers and devices. Currently redesigning the entire website and redeveloping it using newer versions of Umbraco and Bootstrap.

- **Definition 6**
  June 2014/ July 2015 - Web Developer
  My day to day tasks involve creating emails for clients like Barnes & Noble College and Tensar. Using HTML, AMPSCRIPT (Exact Target Language), XML, XSLT, and JAVASCRIPT to put them together. Everything from dynamic emails sent out automatically, to simple single image emails that link to other websites. The email and templates I work on are in Exact Target.

- **Sagepath**
  February/ June 2014 - Web Developer
  I updated, fixed, and replaced code and content for websites like NESrentals.com and Beverageinstitute.org/us/ and its partner sites using HTML, CSS, and a few content management systems such as Umbraco and Wordpress.
